Summary

As a full stack engineer with a BS in Microbiology from ISCOM university Benin, I have a passion for developing web applications that solve real-world problems and enhance user experience. I have multiple certifications in React and TypeScript, and I am currently learning solidity and hardhat to move into blockchain development. I have built a full e-commerce web application for Delvet pharmacy using React for the frontend, express framework alongside Node.js and MySQL as the database. I have also built a full MERN stack application that connects models and users together for Witwater, implementing web socket for real-time chat functionality. I have used axios, react-bootstrap, bootstrap, and bcrypt to handle the api requests, styling, and security of the applications. I have demonstrated responsiveness, creativity, and collaboration in delivering high-quality and user-friendly products. Eager to contribute, adapt, and expand my skills as part of a dynamic team while pursuing excellence in web dev

Experience

Full Stack Engineer

Apus store

Oct 2022 - Dec 2022 (3 months)

Developed an E-commerce web application where React js library was use to developer the frontend application, Node js runtime and express js framework was used to handle API request and the database used was MongoDB

Bootstrap and react-bootstrap library was used to handle the design and the Ui of the application.

Bcrypt package was used to hash user password on creation and compare on login

Full Stack Engineer

Delvet pharmacy

Jun 2023 - Jul 2023 (2 months)

- Led the design and development of an e-commerce web application using the latest technology of React.js, MySQL, Node.js and express.js.

- Designed and implemented scalable APIs for handling users registration,login,authentication and authorization alongside with fetching of products saved in the database.

- The context API to handle state management.

- Enriched system metrics by integrating the platforms with telemetry; facilitated in-depth logging by correlating APIs with vector contexts.

- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing.

Full-stack Developer

Witwater

Apr 2023 - Jun 2023 (3 months)

- Designed and developed a full web application with the latest technology of React.js, MongoDB, Node.js and express.js.
- Designed and implemented scalable APIs for handling users registration, login, authentication and authorization alongside with fetching of posts saved in the database.
- Implemented password hashing using the bcrypt package to ascertain safety of user's passwords in the database
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing.

Education

ISCOM university Benin

Bachelor of Science - BS, Microbiology, General

2018 - 2021

Licenses & Certifications

Frontend internship - Side Hustle Internship

SH-ID-0392591

JavaScript - Sololearn

CT-8FSWKROL

React + Redux - Sololearn

CC-POKLLUC1

Responsive web design - Sololearn

CT-YXRL2FS9

React: Using TypeScript - LinkedIn

TypeScript for Node.js Developers - LinkedIn

Skills

Responsiveness • MERN Stack • Mean Stack • Socket.io • Express.js • MongoDB • Bootstrap (Framework) • Next.js • Front-end Coding • Node.js
